Date :2009-01. intelligent appliances is a general higher education. Eleventh Five-Year national planning materials. book system. comprehensive discussion of the principles and applications of intelligent appliances. the book is divided into eight chapters. Chapter 1 introduces smart appliances and other electrical appliances basic concept of intelligent content. Chapter 2 discusses a smart electrical equipment and control common features. analysis of the feasibility of its intelligent control. Chapter 3 and Chapter 4 introduces the intelligent electrical components and switchgear site and its various operating parameters commonly used measurement of circuit design and circuit elements. to discuss on-site digital processing of analog parametric methods. analysis of measurement error. Chapter 5 focuses on intelligent electrical components and switchgear. and monitor the structure of the hardware and software design. Chapter 6 describes the electromagnetic compatibility with smart appliances basic knowledge about the main types of interference and suppression measures. the relevant test standards and methods. Chapter 7 discusses the intelligent network appliances associated with the basic knowledge. analysis of electrical and structural characteristics of intelligent network design method. Chapter 8 gives the detailed design of intelligent network appliances and illustration of intelligent appliances and electrical intelligent network design process. Smart appliances as institutions of higher learning for electrical engineering. automation engineering and other related undergraduate and postgraduate teaching materials. but also all kinds of electrical appliances as the direction of the field of electrical engineering research and development of training materials for refresher courses. engaged in research and development of intelligent appliances scientists also have a good reference value.
