Reviews

This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

The brain contains millions of neurons (also called brain cells) that are necessary for our learning, cognition and memory retention. However, neurons die, and the brain does not generate more of it unlike other cells in the body. This can lead to memory loss and the reduction of our cognitive skills. From the moment that we are born, we lose few neurons, and the death of brain cells does not stop only until our death. But there are simple and productive techniques that will help your brain to work at 100 ! Have good reading! Here Is A Preview Of What You ll Learn.
