Regent Press,U.S., United States, 2011. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Galactic adventures, environmental wars, science truth, romantic comedy, spiritual truths, fantastic creatures, new worlds, old knowledge, friendship, and lessons in love and life. In the year 2545, Hazel Clay embarks on a journey that will change her life forever. While attending the School of the Cosmos, Hazel finds herself the leader of a secret organization whose goal is to regain control of the school's nano fish, which is the size of a Basilasaurus. This leads Hazel into an underwater city, both enchanting and disturbing. The city is on the brink of exhausting its natural resource—the surrounding underwater forest. The residents are organizing, and Hazel and her friends are at the tipping point of a revolution. Hazel learns to see a clearer view of the Omniverse around her, and experiences many realities, from natural healing to using fungus to remove toxins from soil and water. The book has many environmental themes and is designed to give readers a larger view of the world. Although it is full of real science and new-age material, this book is a sci-fi fantasy that blends school with adventure and knowledge. The subjects include: farming, aliens, space travel, evil empires, environmental wars, natural medicine, qi gong, nano technology, micro-remediation, religion, and of course, revolutions.
