BIOACTIVE HETEROCYCLES IV

Springer Berlin Heidelberg Okt 2007, 2007. Buch. Condition: Neu. Neuware - This volume contains nine more contributions from expert researchers of the field, providing readers with in depth and current research results regarding the respective topics. In the first chapter, Flemming et al. review the chemistry, biosynthesis, metabolism and biological activities of tetrahydrocannabinol and its derivatives. Hansch and Verma contribute to the quantitative structure-activity relationship (QSAR) analysis of heterocyclic topoisomerase I and II inhibitors. These inhibitors, known to inhibit either enzyme, act as antitumor agents and...

Reviews

Here is the finest publication I have read through until now. I am quite late in starting reading this one, but better than never. I am just easily able to get a pleasure of studying a great publication.

-- **Morgan Bashirian**

This PDF is so gripping and exciting. I actually have gone through it and that I am confident that I will go back to read it once again in the future. I discovered this publication from my dad and I advised this eBook to discover.

-- **Mr. Elwin McGlynn Jr.**

These kinds of eBooks are almost everything and got me to searching forward and a lot more. It usually does not price excessively. It has been written in an exceedingly basic way and is particularly only following it finished reading through this PDF through which in fact modified me, alter the way I really believe.
