Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Human Engineering: A Reference Book on the Dynamic Mind Fundamentals, Incorporated in Manufacturing and Business Engineering Many humans travel the old beaten paths laid out by their forefathers; men who cleared the forest, conquered the savages, men of unbounding courage and fortitude. They made extreme sacrifices, they laid the foundation for the greatest house the world will ever see, democracy, the house for all civilization; and we should carry on this great work with that same aggressive spirit; we must go forward. The developing of the world should not stop where they left off, it should not be accepted as a finished product, we should not blindfold our selves; blind beliefs will simply hold up the work on this great house for humanity. A successful and broad gauged man must be one of the standard bearers of love and truth. He should not use any part of those reactionary elements in human progress, he must have a clear brain free from all corruptions. The live business and professional men of to day are taxed to their limit keeping pace with the world that is fast changing. For this reason the writer believes the time is ready for the presentation to the public of this text-book on the development of man and business, a modern reference for manufacturing and business engineers. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
