INTRODUCTION TO REFRIGERATION AND AIR CONDITIONING SYSTEMS: THEORY AND APPLICATIONS (PAPERBACK)

Morgan Claypool Publishers, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This text provides background information, description, and analysis of four major cooling system technologies-vapor compression cooling, evaporative cooling, absorption cooling, and gas cooling. Vapor compression systems are currently the primary technology used in most standard domestic, commercial, and industrial cooling applications, as they have both performance and economic advantages over the other competing cooling systems. However, there are many other...
