FRISON ROCHE, 2011. soft. Condition: NEUF. Cardiological therapy is refined day by day on the basis of clinical trials and meta-analyses, the results of which, insufficiently known Cor applied, have demonstrated and justified with an almost absolute strength of evidence the value of a given molecule depending on the patient's clinical state. The proposed treatment guidelines are directly derived from results of more than four hundred large-scale clinical trials and one hundred and a half studies and meta-analyses, amplified and strengthened by the main guidelines of scientific societies, usually American or European. These treatment guidelines provide the prescriber with a scientific and practical guide to the procedures and rules that now govern modern cardiological therapy in line with the most recent scientific data. - Langue : eng - Genre : Médecine (ouvrages de référence).
