Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Algebra Self-Taught Mathematics naturally divide into two divisions, to which are related (a) the solutions of problems where it is the object to ascertain the value of unknown (from the relation which they bear to known) and constant quantities; and (b) the investigation of variable quantities increasing or decreasing uniformly with regard to other quantities that are constant. When dealing with (a) we are in the dominions of ordinary Algebra the consideration of B is effected by means of the Differential and the Integral Calculus. In the present work, then, we have only to take into view constant quantities, or quantities to which, if a value is once assigned, retain that value to the end of the problem. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
