Reviews

It is just one of the best publications. This can be for anyone who states that there was not a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Similar tumors of bone may occur at any point throughout the bony system, producing disturbance by pressure on important structures. Tumors in the various organs of the body, occur apparently from similar causes, and in the same irregular way in point of time, involving, in order of frequency, as follows: Testes, liver, kidneys, brain, lungs, heart, etc. In some cases walls of the blood-vessels are found infiltrated with the same material of which the tumors of syphilitic origin are found to be composed, and become obstructed, as in the brain, often causing fatty degeneration of the structures to which they are distributed. In some cases, cicatricial bands are found to develop in organs the subject of syphilitic tumors, and by contraction and consequent constriction, destroy the secreting structures, notably seen in the liver and testes of subjects suffering from the later effects of the syphilitic influence in these organs. It will thus be seen that the diseased conditions, enumerated as characteristic of chronic syphilis (the tertiary and quaternary syphilis of Lancereaux and other authors), are essentially different from true or acute syphilis, in date of appearance, mode and locality of development, and in the entire absence of the contagious syphilitic...
