The growth of the Internet may be affected by a number of issues being debated by Congress. This report summarizes several key technology policy issues. 1. Internet privacy issues encompass concerns about information collected by website operators and by spyware, and about the extent to which law enforcement officials are allowed to monitor an individual's Internet activities. Congress has passed several laws already, but continues to debate what other legislation may be needed. 2. Concerns about computer and Internet security are prevalent in both the government and private sectors. Issues have also been raised about the vulnerability of the nation's critical infrastructures (e. g. electrical power supply) to cyber attacks. Issues for Congress include oversight and improvement of the protection of federal computer systems and cooperation with and between the private sectors. 3. Broadband Internet access gives users the ability to send and receive data at speeds far greater than current Internet access over traditional telephone lines. With deployment of broadband technologies beginning to accelerate, Congress is seeking to ensure fair competition and timely broadband deployment to all sectors and geographical locations of American society. This item ships from La Vergne, TN. Paperback.
