Modern Problems of Biology

By Charles Sedgwick Minot

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: . . . not show the rate of growth. The real rate can be represented in the following manner with approximate accuracy. From the weight which an animal has on a given day and that which is found at the next weighing, I reckoned the average daily increase during the period between the two weighings, and then changed these increases into the per cent. value of the weight at the beginning of the period. This method may be modified by calculating instead of the daily, the monthly or yearly percentage increases. 511170Z935 1, 5 60 75 90 105 120 135 150 165 180 195 210 days Fig. 27. --Curve of the daily percentage increase in weight of male guinea-pigs. The method is of course mathematically not exact, since the weight is constantly changing. It suffices, however, for our purposes. It is easy after one has calculated a series of...
