PROBABILISTIC INDUCTIVE LOGIC PROGRAMMING

Springer Berlin Heidelberg Mrz 2008, 2008. Taschenbuch. Condition: Neu. Neuware - One of the key open questions within artificial intelligence is how to combine probability and logic with learning. This question is getting an increased attention in several disciplines such as knowledge representation, reasoning about uncertainty, data mining, and machine learning simultaneously, resulting in the newly emerging subfield known as statistical relational learning and probabilistic inductive logic programming. A major driving force is the explosive growth in the amount of heterogeneous data that is being collected in the business and scientific world. Example domains include bioinformatics, chemoinformatics, transportation systems, communication networks,...
