A METHOD FOR THE VALIDATION OF SPACE DEBRIS MODELS AND FOR THE ANALYSIS AND PLANNING OF RADAR AND OPTICAL SURVEYS

Shaker Verlag Nov 2003, 2003. Taschenbuch. Condition: Neu. Neuware - Today, mission planners fully rely on space debris models to assess the mission risk for spacecraft. To increase the reliability of these models they need to be validated by all available measurement data. Currently, ground-based optical and radar sensors provide most of the required data. However, these data are subjected to the geometrie constraints and selection effects as well as to the sensitivity of the instruments. The scope of this...

Reviews

Unquestionably, this is actually the very best work by any article writer. It usually does not price a lot of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Augustine Pfannerstill**

This book will be worth buying. Better then never, though i am quite late in start reading this one. You may like how the blogger compose this publication.

-- **Mrs. Kylie Oberbrunner II**

Absolutely essential go through book. It is actually loaded with knowledge and wisdom You can expect to like the way the blogger compose this pdf.
