VALUE OF NONPROTEIN. The crude protein of the feed of farm animals includes not only true protein but a great variety of other nitrogenous substances, grouped for convenience under the designation Nonprotein. In considering the results of experiments upon the protein requirements of these animals, therefore, it is necessary to determine whether the true protein should be the basis of comparison or whether the nonprotein has some value for maintaining the protein tissues of the body. The writer has recently 1 considered in some detail the experimental evidence on this point, and the discussion need not be repeated here. It appears to have been demonstrated by recent experimental results, especially by those of Kellner, Morgen, and the Laboratory for Agricultural Research in Copenhagen, that the nonprotein of ordinary feeding stuffs is available for the maintenance of ruminants, probably indirectly through a conversion to protein by means of bacteria in the digestive tract. On the other hand, investigations have not thus far shown that such nonprotein has any material value for production purposes. The writer therefore reached...
