Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1831 Excerpt: . mentioned. Now as the square of a number of tens gives at least hundreds, it follows that three times the squares of the tens by the units, must be found in the part 398 to the left of 23, which is separated from it by a point. Therefore, dividing 348 by three times the square of the tens, which is 48, the quotient 8, will be the unit of the root, or something greater, since 398 hundreds is composed of three times the square of the tens by the units, together with the two other parts. We may ascertain whether the figure 8 is too great, by forming the three parts which enter in 39823, by means of the figure 8 and the number of tens 4; but it is much easier to cube 48, as has been done in the above table. Now the cube of 48 is 110592, which is greater than 103823; therefore 8 is too great. By cubing 47 we obtain 103823; hence the proposed number is a perfect cube, and 47 is the cube root of it. N. B. The units figures could not be obtained first; because the cube of the units might give tens, and even hundreds, and the tens and hundreds would be confounded with those which arise from other parts of the cube. Again, extract the cube root of 47954 The number 47954 being below 1000000, its root contains only two figures, viz. tens and units....
