On the Validation of the Sharp-Wheeler Bubble Merger Model from Experimental and Computational Data (Classic Reprint) (Paperback)

By James Glimm

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from On the Validation of the Sharp-Wheeler Bubble Merger Model From Experimental and Computational Data It has been postulated that two adjacent bubbles will merge and finally form a single bubble with a radius equal to the sum of the original two bubbles and the height determined by the conservation of mass within its cross section. The merger is governed by the criterion (4) which means that as soon as the large bubble is a distance ahead of the smaller one by. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
