

Transactions on Edutainment II

Filesize: 9.29 MB

Reviews

This ebook might be worthy of a read, and far better than other. it was writtern really flawlessly and useful. I found out this pdf from my i and dad recommended this ebook to learn.

(Prof. Ruben D'Amore PhD)

TRANSACTIONS ON EDUTAINMENT II

DOWNLOAD

Springer-Verlag Gmbh Jul 2009, 2009. Taschenbuch. Condition: Neu. Neuware - With great pleasure we present the second volume of the new journal Transactions on Edutainment. This journal, part of the Springer series Lecture Notes in Computer Science, is devoted to research and development in the field of edutainment. Edutainment, also known as educational entertainment or entertainment education, denotes all forms of entertainment designed to educate as well as to provide fun. This approach is motivated by the increasing demands on individuals for life-long learning and the need to integrate effective learning opportunities throughout life. As such, edutainment has attracted increasing interest in the last few years. The first five articles of this issue represent a selection of outstanding contributions from GDTW2008, the 6th International Conference in Game Design and Technology held in the UK, in November 2008. The main aims of the workshop are: (1) To provide a forum to discuss state-of-the-art games design and current and future games technology with the specialists. (2) To enable academics and researchers in computer game technology and computer entertainment to present their work during the research sessions, and to seek opportunities for collaboration with industry and for academic research partners. (3) To facilitate relationships and collaboration between academics promoting computer games technology courses, the UK games industry and supporting organizations. These five papers cover mainly the topic of edutainment platforms or methodology: Coordinating Heterogeneous Game-Based Learning Approaches in Online Learning Environments, Networking Middleware and Online-Deployment Mechanisms for Java-Based Games, A Testbed for P2P Gaming Using Time Warp, How to Steer Characters in Group Games, and Time-Based Personalized Mobile Game Downloading. The next six articles represent a selection of outstanding contributions from Cyberworlds 2008 held in Hangzhou, China, in September 2008. 313 pp. Englisch.
