CRS REPORT FOR CONGRESS: NUCLEAR ENERGY POLICY: JANUARY 12, 2001 - IB88090**DOWNLOAD PDF**

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Nuclear energy policy issues facing Congress include questions about radioactive waste management, research and development priorities, power plant safety and regulation, nuclear weapons proliferation, nuclear weapons facilities cleanup, and technology for producing nuclear fuel. Federal funding for nuclear energy research and development was substantially reduced by the Clinton Administration, which placed a higher priority on energy efficiency and alternative energy technologies. However, the Department of Energy (DOE) sought, and Congress provided, 35 million in FY2001 for the Nuclear Energy Research Initiative, which focuses on advanced nuclear technology research. Disposal of highly radioactive waste has been one of the most controversial aspects of nuclear power. The Nuclear Waste Policy Act of 1982 (P. L. 97-425), as amended in 1987, requires DOE to begin detailed physical characterization of Yucca Mountain in Nevada as a permanent underground repository for high-level waste. Legislation was introduced in the 106th Congress (H. R. 45, S. 608) to establish an interim storage facility for nuclear waste at Yucca Mountain. But the Clinton Administration opposed temporary storage at the site. In response, the Senate approved an alternative measure February 10, 2000, to authorize DOE to store waste at Yucca Mountain only after receiving a construction permit for a permanent repository . . . This item ships from La Vergne, TN. Paperback.
