Barnes & Noble Classics. Paperback. Condition: New. 480 pages. Dimensions: 8.0in. x 5.2in. x 1.4in. The Origin of Species, by Charles Darwin, is part of the Barnes and Noble Classics series, which offers quality editions at affordable prices to the student and the general reader, including new scholarship, thoughtful design, and pages of carefully crafted extras. Here are some of the remarkable features of Barnes and Noble Classics: New introductions commissioned from today's top writers and scholars; Biographies of the authors; Chronologies of contemporary historical, biographical, and cultural events; Footnotes and endnotes; Selective discussions of imitations, parodies, poems, books, plays, paintings, operas, statuary, and films inspired by the work; Comments by other famous authors; Study questions to challenge the reader's viewpoints and expectations; Bibliographies for further reading; Indices and Glossaries, when appropriate. All editions are beautifully designed and are printed to superior specifications; some include illustrations of historical interest. Barnes and Noble Classics pulls together a constellation of influences—biographical, historical, and literary—to enrich each reader's understanding of these enduring works. On December 27, 1831, the young naturalist Charles Darwin left Plymouth Harbor aboard the HMS Beagle. For the next five years, he conducted research on plants and animals from around the globe, amassing a body of evidence that would culminate in one of the greatest discoveries in the history of mankind—the theory of evolution. Darwin presented his stunning insights in a landmark book that forever altered the way human beings view themselves and the world they live in. In *The Origin of Species*, he convincingly demonstrates the fact of evolution: that existing animals and plants cannot have appeared separately but must have slowly transformed from ancestral creatures. Most important, the book fully explains the mechanism that effects such a transformation: natural selection, the idea that made evolution scientifically intelligible for the first time....
