

A Journey through England and Scotland to the Hebrides in 1784 2 Volume Set A Revised Edition of the English Translation Cambridge Library Collection - British and Irish History, 19th Century

By Barthélemy Faujas De St-Fond

Cambridge University Press. Paperback. Condition: New. 798 pages. Dimensions: 8.6in. x 5.5in. x 1.8in. The French geologist Barthélemy Faujas de Saint-Fond (1741-1819) abandoned the legal profession to pursue studies in natural history, working at the museum of natural history in Paris and as royal commissioner of mines. His enthusiasm for geology took him in 1784 to Britain, to investigate the basalt formations on the Hebridean island of Staffa described by Sir Joseph Banks in Pennants Tour in Scotland (also reissued in this series). His subsequent account was published in France in 1797, and first translated into English in an abridged form in 1814. This two-volume annotated translation by the well-known geologist Sir Archibald Geikie (1835-1924), prefaced by a short biography of Faujas, was published in 1907. The work is interesting for its social as well as its geological observations, and as Geikie says, this intelligent and often racy narrative giving the impressions and experiences of a cultivated foreigner deserves to be remembered. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
