This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).

Hair presenting a peculiar appearance from having a second or outside casing of epithelium covering a portion of the shaft: no spores or threads of fungus were found. Case 10.--Alopecia circumscripta. Several bald spots and grey patches throughout the scalp; hair distorted and deprived of colouring matter; a quantity of epithelium scales surrounded the shaft, but no vegetable growth. Case 12.--Alopecia complete. Nearly every part of the body denuded of hair, a few eyelashes remaining; no fungoid growth, although the patient seemed to be rather afraid of water. In the course of a few months a considerable improvement took place; a new growth of hair appeared under the arsenical treatment and the application of a stimulating ointment.
