HYDROCARBON AND LIPID MICROBIOLOGY PROTOCOLS: BIOCHEMICAL METHODS (SPRINGER PROTOCOLS HANDBOOKS)

Springer. Hardcover. Condition: New. This Volume provides protocols for the biochemical analysis of hydrocarbon- and lipid-relevant products, cell components and activities of microbes that interact with hydrophobic compounds. They include methods for the extraction, purification and characterisation of surface tension-reducing bioemulsifiers and biosurfactants that increase the surface area and hence bioavailability of hydrophobic substrates. Protocols for the isolation and biochemical analysis of lipids and polyhydroxyalkanoates, food storage products made during nutrient abundance that represent important biotechnological products, are presented. The...
