Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Evaluating Communications in Product Development Organizations The goal of this work is to define and explore a methodology for examining communication patterns within product development organizations. The methodology is based on first predicting important patterns of communication and then measuring communication to see if the anticipated linkages exist. The following study applies this methodology to a product development project in industry. The results offer further insight into communication patterns in product development and provide a basis for future research. This work is motivated by the critical importance of product development in today s businesses and the general lack of specific understanding of communication issues in product development organizations. Successful companies as observed by Wheelwright and Clark must anticipate and fulfill customer needs and deliver products to market quicker than their competition; in a fast paced global economy, only the companies that do this effectively will survive. Our approach to facilitating the critical product development function is based on studying the information transfer between members in the product development organization. Communication studies have been applied to many organizations but little work has been tailored specifically to the product development process. Work on product development organizations done by Barczak and Wilemon Griffin and Hauser [1992] analyze patterns of communication and relate them to the success of projects. Our focus is to prescribe important communication linkages in a product development organization and then to measure these linkages to see if they exist.
